TRANSLATION

- (12) Appendix to
- (13) **Certificate**
ZP/B144/22-PZ
- (14) 14.1 Subject and type
Anchor device type A
Type: ABS-Lock® -360

14.2 Description

The anchor device of type ABS-Lock® -360 (Fig. 1 – 3) and its possible variants is used as a single anchor point to protect maximum three persons against falls from a height; it is intended for assembly on surfaces of concrete or steel of sufficient strength. For the assembly, an appropriate fastening element is inserted into the two-part round base (Ø 50.0 mm) using a sleeve.

On the side of the base, there are two drill holes (Ø 10.0 mm) which are used to receive the attachment eyelet (t = 8 mm). The user connects his personal protective equipment to this eyelet to protect himself against falls from a height. The anchor device is made to bear loads exerted from any direction and is made of corrosion-resistant material.
